9112-BT KIT

ROFU is proud to announce our first wireless solution using Bluetooth technology to access your door! Now just by leaving your phone in your pocket the encrypted proximity function allows you to remotely open the door or gate from up to 164 feet. The administrator can easily add, delete, or edit users and check door activity. This is not only an easy installation, but it is the most secure way to wirelessly control door entrance for commercial use at a cost-effective price.
